resistant sole

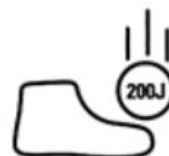

Antistatic shoe

Breathable upper

Water-repellent
upper

Steel or composite
toe cap

UPPER

Highly resistant, ultra-lightweight, soft microfibre. Breathable and water-repellent, long-lasting quality. Highly-resistant, breathable fabric inserts. Water-repellent treatment which repels water and oil-based stains.

LINING

Padded, non-woven fabric, highly resistant to wear and tear, comfortable.

SOLE

Removable, antibacterial, absorbent, FUSSTATIC, which ensures the wearer's foot remains dry at all times.

SOLE

Anti-static, dual-density, polyurethane, particularly lightweight and flexible. Outsole with special reliefs and special, polyurethane mixture which guarantees hi-grip on all surfaces and in all conditions, resistant to corrosion by oils and hydrocarbons. Shock absorption in the heel area.

SAFE-T-TEC
PROFESSIONAL SAFETY EQUIPMENT

TOE CAP

Steel, shock absorption max. 200 Joules.
